

Wealth & Poverty Disparity in Our World

Our world has been polarized into two highly disparate camps, the chronically impoverished & the obscenely wealthy.

- The 225 richest individuals in the world assets greater than the annual income of 2.5 billion or more than 40% of the world's population
- 80% of people in the world live below American & European poverty line
- The number of people living on less than one dollar a day equals 1,200 million
- Sept. 11, 2001 24,000 died of hunger

Photo - WHO & World Bank

Wealth & Poverty Disparity in Our World

- Of the 100 largest economies in the world today, 51 are business corporations, while 49 are nation-states
- With 739 million people in Africa, there are only 14 million phone lines on the entire continent
- South Asia, with nearly 25% of the world's population, has less than 1% of the world's wealth
- Whether in poor or wealthier nations, the gap between the very rich & the very poor is widening. In the United States today, 1 percent of the population owns 40 percent of the country's wealth

Life Threatening Techno-Businesses

The benefits of technology have been darkened by shadows of abuse which today imperil the ultimate survival of humanity.

- ✓ Due to agribusiness & timber interests, losing over 9 million hectares of million hectares seriously degraded
- ✓ Out of approximately a million “reported” pesticide poisonings annually, the human death toll exceeds 40,000 yearly
- ✓ A Johns Hopkins report confirms a top estimate of 284,000 deaths annually in the USA caused by Western medical treatment, thus ranking iatrogenesis as the 3rd leading cause of death in the nation (JAMA 2000, 07/26; 284-483)
- ✓ When physicians go on strike death rates drop by 50-60% within a week to 10 days (Israel, Canada, Holland, USA.)

forest each year, with 18

Agribusiness Technologies & Crop Diversity Loss

Agribusiness interests have brought about extensive monocropping across the globe, which has precipitated:

- ▶ Massive increases in soil erosion & lessening of natural soil fertility *
- ▶ A significant weakening of natural biological pest controls &
- ▶ A 75% loss in genetic diversity for the world's 20 major food crops

* Today approximately 100 trace minerals & elements are deficient in human diets in most regions of the world.

Remineralized foods are a potent force in regenerating human & animal health.

The Futile War With Nature

According to *Cornell Univ.* Entomologist David Pimental, over a period of four decades in the last half of the 20th Century, globally the share of crop yields lost to insects virtually doubled (7% to 13%). This huge increase in losses occurred, despite a more than 10 fold increase in both the quantity & in the level of toxicity of the synthetic insecticides used.

His research findings also reveal that frequently “less than 0.1%” of pesticide applications are actually reaching targeted pests.

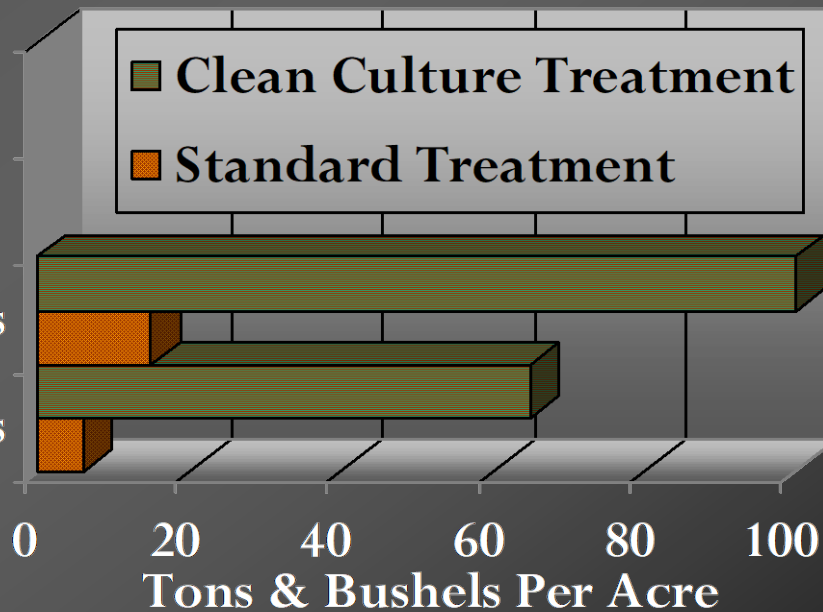

The Promise of Clean Organiculture

Early twentieth century experiments in England by Sampson Morgan demonstrated incredible yields when soils were aerated & re-mineralized employing stone dust (clean culture agriculture).

Yield Comparisons

Wheat Yield in Bushels

Potato Yield in Tons

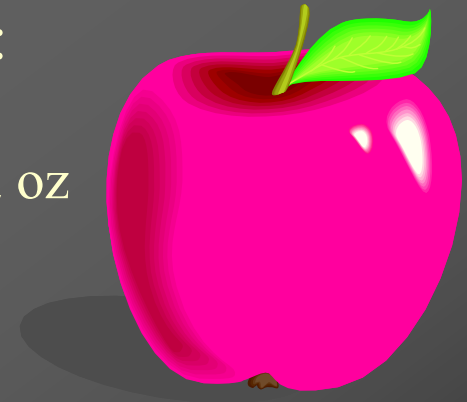

The Promise of Clean Organiculture

Using stone-dust fertilization Morgan grew:

- ▶ Pear & apple specimens weighing two pounds (including the largest apple ever recorded at 34-½ oz & exceeding a foot in circumference)
- ▶ Onions averaging one pound &
- ▶ Celery up to 40 inches in length

In a semiarid region of the U.S where conventional corn yields fell under 25 bushels per acre Hamaker produced corn yields of 65 bushels per acre by employing stone-dust . In comparison with chemically fertilized corn grown at nearby farms, his crops exhibited: 28% more protein; 47% more calcium; 57% more phosphorus; 60% more magnesium; & 90% more potassium.

Peacemaker Foundation for Development of the Human Family

The prime purpose of the *Peacemaker Foundation for Development of the Human Family* is to collaboratively & supportively work with peoples in all regions of the world as they seek to envision & fulfill their essential life needs.

Projects & activities will principally focus on the following fields:

- ⇒ Human & Community Development;
- ⇒ Nature & Lifestyle Based Medicine;
- ⇒ Organic Soil Regenerative Agriculture &
- ⇒ Familial Based Childhood Education

CIDA Photo – Nepal, Graham Sim

Peacemaker Foundation for Development of the Human Family

The *Peacemaker Foundation's* cooperative & technical assistance to peoples of all cultures, creeds & classes will demonstrate the Creator's love in transparent & practical ways.

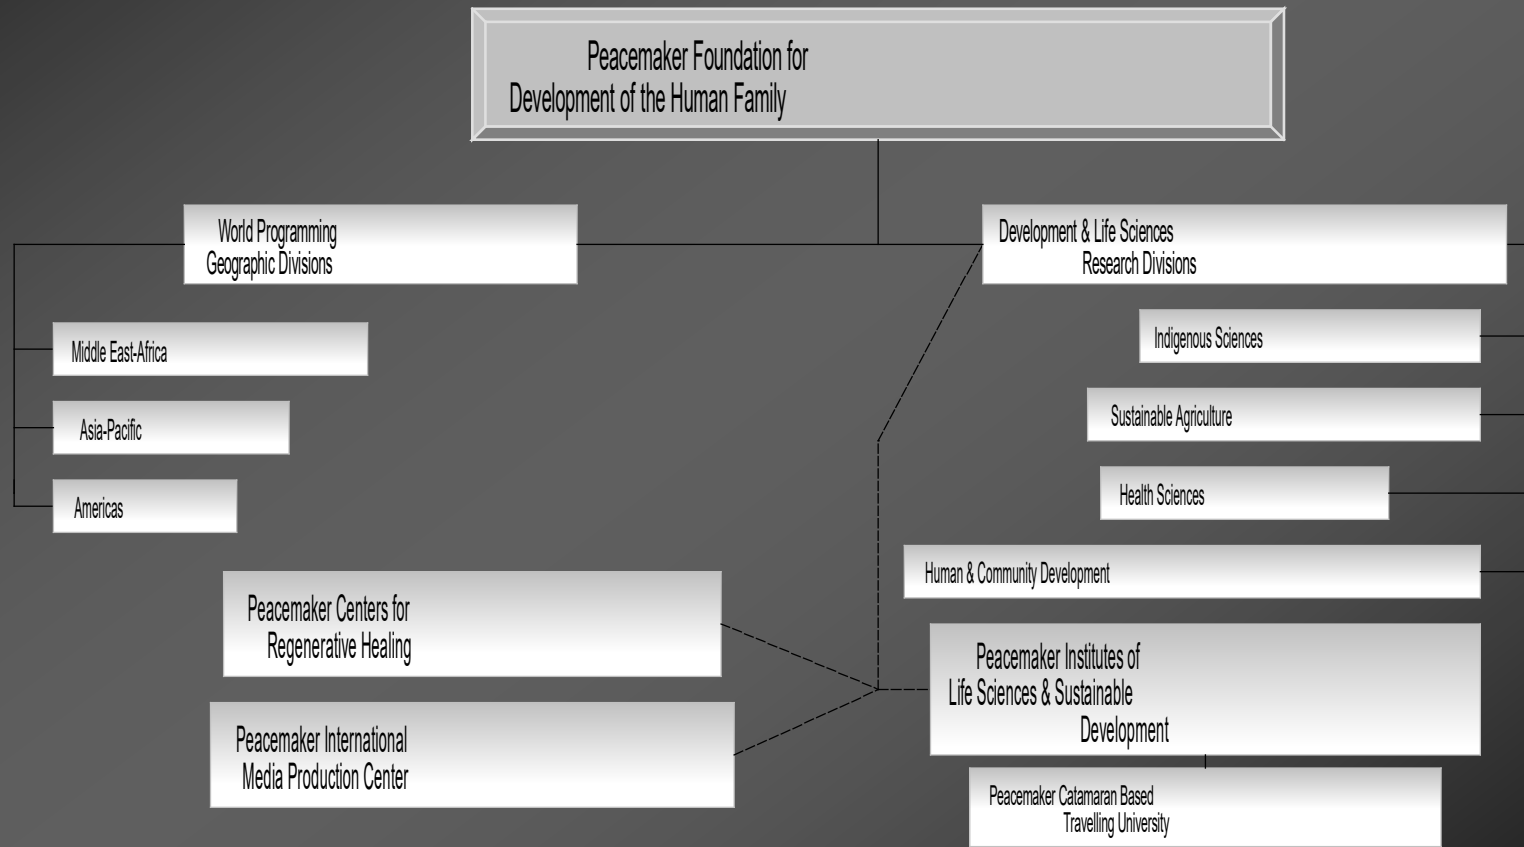

Many thousands of project participants & beneficiaries will derive great benefit from their interested reception of the regenerative principles & truths of the Christian gospel.

Peacemaker Foundation for Development of the Human Family Organization Chart

Foundation Life Sciences Research Divisions

On behalf of the Foundation's *Geographic Divisions* the *Life Sciences Research Divisions* will carry out wide ranging human & Community development research focusing on vital areas such as:

- ✦ Comprehensive Mind-Body Healing;
- ✦ Advanced Organic Agriculture Systems;
- ✦ Community Renewal;
- ✦ Cross-cultural Reconciliation; &
- ✦ Spiritual Regeneration

IFAD Photo – Yunnan (China) Lou Dematteis

Foundation Life Sciences Research Divisions

The Foundation's *Life Sciences Research Divisions* will play a critical role in evaluating, documenting & strengthening the highly advanced projects & programming activities that the *Peacemaker Foundation* undertakes in all regions of the world.

IFAD Photo – Bolivia, Susan Beccio

Division of Indigenous Sciences

IFAD Photo – Bolivia, F. Mattioli

The *Division of Indigenous Sciences* research, document & disseminate key knowledge of the nature based systems of Indigenous people in a variety of fields such

- ❖ plant medicines
- ❖ poly-culture agriculture systems
- ❖ aquaculture &
- ❖ conflict resolution, etc.

Division of Indigenous Sciences

The *Division of Indigenous Sciences* will engage in botanical medicine research. This will include:

- ⇒ Conducting extensive research & documentation on worldwide plant medicine usages (preventive & therapeutic) in human & veterinary medicine
- ⇒ Undertaking a global project initiative support the development of community health with orchards & medicinal gardens &
- ⇒ Developing regional medicinal seed banks throughout the world

Indigenous Building Techniques

An ancient technique still used today in Tibetan villages on the Tibetan Plateau of China, are structures made of rammed earth (usually about 70% sand & 30% clay).

Such structures are noted for:

- their amazing strength (said to be as strong as a bomb shelter);
- long life (durable for centuries not with absolute minimal
- being dry & immune to rot & insect damage;
- remaining warm in cold weather & cool in hot weather;
- being fireproof; & soundproof

Rammed Earth Home Zhongdian, China

High Costs of Ignoring Indigenous Knowledge in Development

A *World Bank* paper entitled “Indigenous Knowledge for Development: A Framework for Action” (1998), informs us that a study of 121 rural water projects in 49 countries found that:

- ❖ 70 percent of projects succeeded when the experience & knowledge of intended beneficiaries were inputted into project design; *whereas in contrast*
- ❖ Only 10 percent of projects succeeded when *Indigenous Knowledge* inputs were not sought

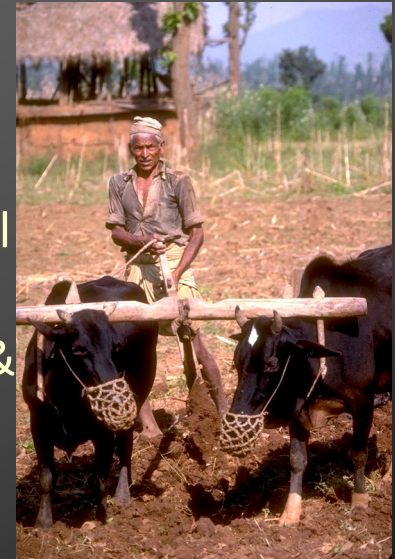

Division of Sustainable Agriculture

The Foundation's *Sustainable Agriculture Division* will experimentally field test & document highly advanced approaches to soil regeneration & plant food productivity based on the following methods & principles:

- ⊕ Respectful & creative adaptation to differing cultures, topographies & climates
- ⊕ Employment of locally based non-toxic natural resources & inputs
- ⊕ Integration of the best elements of local traditional & contemporary science systems
- ⊕ Environmental soundness &
- ⊕ Practical affordability

CIDA Photo – Nepal

Division of Health Sciences

A growing body of scientific evidence clearly demonstrates the superiority & economy of Nature Based & Lifestyle Medicine. Whole food nutrition from healthy soils, rest, potable water, sunlight, pure air, balanced exercise, moderation & trust in the Creator are key elements to making health care systems significantly more effective & less costly.

The *Division of Health Sciences* will explore & document how such approaches can be better implemented, monitored & evaluated in field projects around the globe. It will also examine ways & means of integrating these vital interventions into national health care policies & programming.

Division of Human & Community Development

Human & community development is about working cooperatively with local peoples in jointly planning & implementing measures whereby they can lead longer, fuller & more productive lives.

The Division's Measure of success at the community level will be:

- increased empowerment to make decisions
- improved health status
- fuller access to useful knowledge
- enhanced sustainable production & income

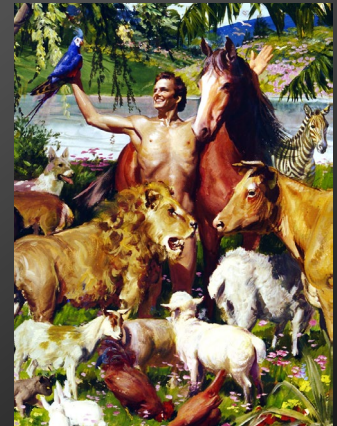

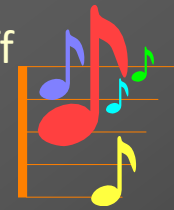

Peacemaker International Media Production Center

The *International Media Production Center* will research, produce, disseminate & market video/DVD documentaries & movie products that will serve to enlighten & benefit the human family. Key projects will include:

- ⌘ Instructional Series for the Foundation's Training Programs
- ⌘ Documentary on the Deleterious Impacts of Rock Music on Human Society
- ⌘ Documentary on Organized Efforts to Suppress Effective Alternative Cancer Therapies
- ⌘ Documentary on Universal Immunization Public Policy & the HIV-AIDs Hidden Controversies
- ⌘ Televised Series on Natural World Evidences of Intelligent Design in the creation

Peacemaker Institutes of Life Sciences & Sustainable Development

Peacemaker Institutes Global Campus will in turn spawn regional campuses in key regions of the world. These training institutes will afford students with intensive & experiential skills training in advanced principles of natural healing, organic soil regeneration & other key dimensions of human & community development.

Cost covered term apprenticeships
students in various

Development Foundation field
projects will richly complement

Peacemaker

Regional campuses will afford rural based student accommodations, classrooms, natural healing complexes with adjacent gardens & horticulture.

Graduates will be guaranteed placement & sustained employment in various *Peacemaker International Development Foundation* sponsored projects.

Specialized training options to reach & serve particular disadvantaged groups will be offered.

Peacemaker Traveling University

This *Peacemaker Institutes* will operate a “traveling university” based on a catamaran ship, offering at major ports of call throughout the world, both ship & land based training seminars in critical areas such as: natural medicine; organic agriculture & human development.

The focus will be to reach key legislators, government interested professionals vital advanced knowledge in respective fields.

Peacemaker Centers for Regenerative Healing

With the inception of global & regional *Peacemaker University* campuses & programs, affiliate *Centers for Regenerative Healing* will be established. These *Centers* of treatment & training will effectively remediate a wide diversity of degenerative diseases by employing key nature based healing modalities, e.g.:

- Plant Medicines & Nutrition Based Interventions
- Helio & Hydro Therapies
- Ozone & Hyperbaric Therapies
- Prescribed Therapeutic Exercise
- Therapeutic Fasting
- Spiritual Values & Prayer

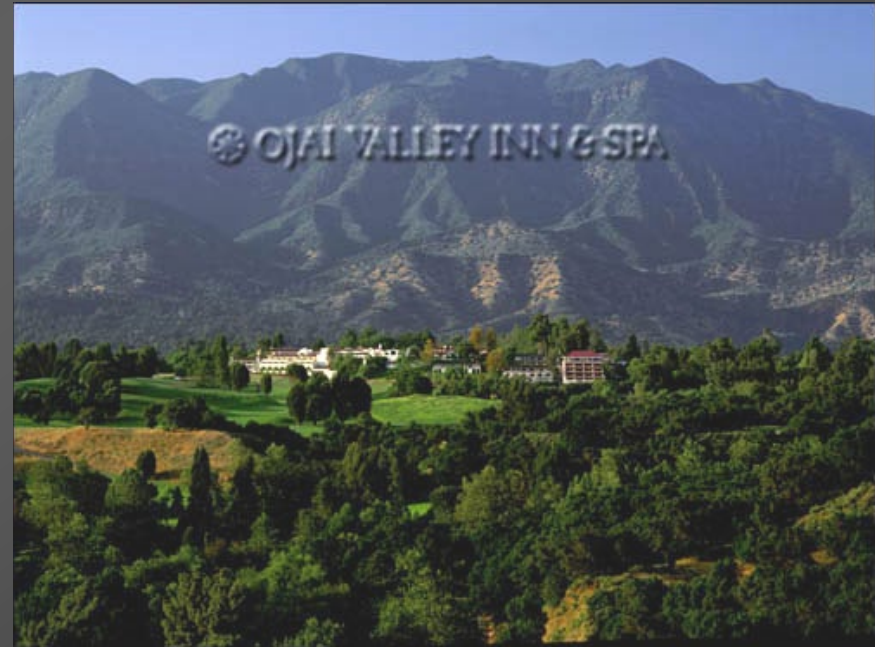

Planned Global Operations Headquarters

Ojai Valley California with its Mediterranean climate is a lightly populated area with lush groves of citrus, olive, avocados, & mineral hot springs. It has a worldwide reputation as a place of peace & healthfulness.

The *Ojai Valley Inn & Spa* is located on 220 acres in this spectacular & agriculturally rich valley.

Health Spa Component

The Inn's 31,000 square foot Spa component includes the:

- ⇒ Kuyam Treatment Room
- ⇒ Warm Water Fountain Pools
- ⇒ Salon
- ⇒ Aerobics/Fitness Rooms
- ⇒ Saunas & Steam Rooms

Ojai Valley Inn & Spa Complex

- ⇒ 511 guest rooms & suites
- ⇒ 15,000 sq ft of meeting space, including: 16 rooms for classroom groups of 15-150; a 4,800 sq ft convention room; & 3,600 sq ft pavilion
- ⇒ 2,000 sq ft Fitness center;
- ⇒ Four restaurants;
- ⇒ Three heated outdoor pools;
- ⇒ Tennis courts;
- ⇒ Ranch stables & riding facilities;
- ⇒ Hiking/jogging trails

Ojai Valley Inn & Spa Complex

Upon its acquisition, this uniquely serviceable property will be able serve the *Peacemaker Foundation* as a global facility housing all elements of the Foundation's projected administrative, institutional & international outreach components.

Ojai Valley Inn & Spa Complex

It is believed that the *Ojai Valley Inn & Spa* property can be acquired from *Crown Company Industries* of Chicago, for an offer in the range of \$275 to \$325 million. The median is requested, i.e. \$300 million. An additional \$35 million is sought to cover: modifications, conversions & enhancements to the physical facility & grounds (e.g. staff housing, orchards & vineyard, etc.) three years maintenance, heat, electric & contingencies.
